

PEARMAN™

PERSONALITY INTEGRATOR

Leadership Lens

for Mariana Felicita

January 20, 2016

Introduction to the Pearman™

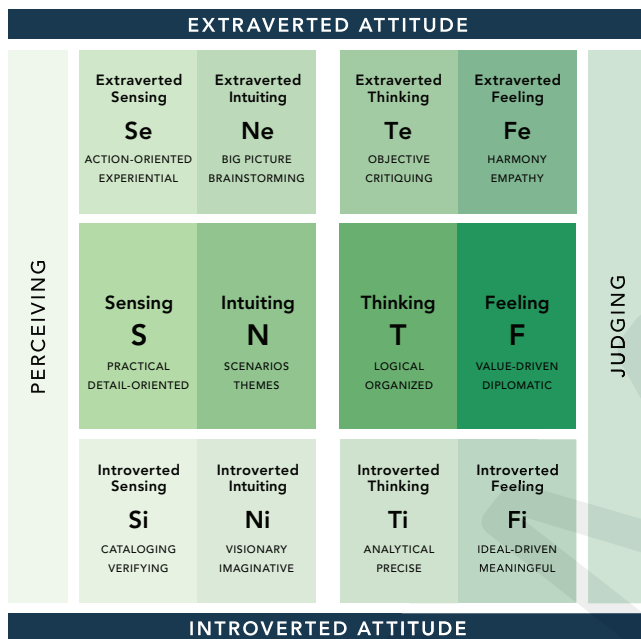

Welcome to your Pearman Personality Integrator™ report, where you will learn about your personality type and flexibility skills.

This page provides an introduction to the Pearman and an overview of the two major sources of information in the report: Part I: Pearman Personality and Part II: Pearman FlexIndex™.

While these two concepts are described independently below, it is through the combination and integration of both of these concepts that the Pearman provides individuals like you with personal insight and a greater understanding of how you function in the world.

THE PEARMAN MODEL

PART I: PEARMAN PERSONALITY

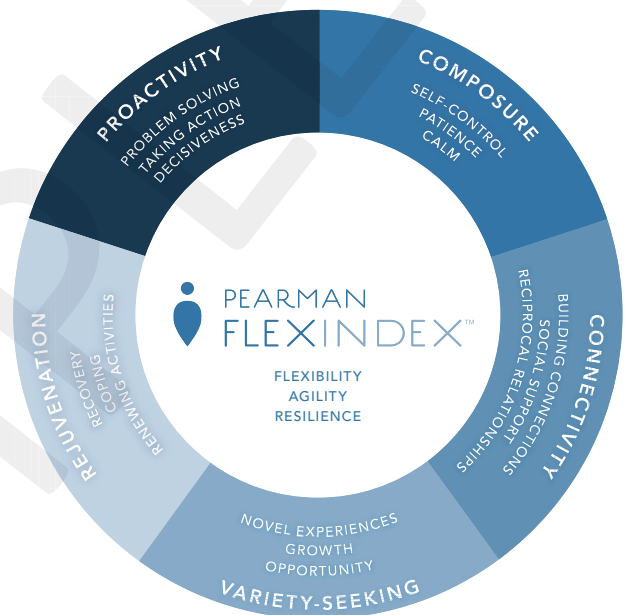

Part I: Pearman Personality

Pearman Personality provides insight into how you approach the external and internal world (your **overall attitude**, divided into extraversion [E] and introversion [I]), how you understand and perceive information (your **overall perceiving** function, divided into intuition [N] and sensing [S]), and how you evaluate information and make decisions (your **overall judging** function, divided into feeling [F] and thinking [T]).

The Pearman goes one level deeper by providing information on specific behaviors by combining your attitude with your perceiving and judging functions. Labeled **mental functions**, these combinations help you to understand how you take in information or make decisions in the external world (i.e., extraverted perceiving and judging) and the internal world (i.e., introverted perceiving and judging).

Pearman Personality also evaluates what comes naturally to you separately from the behaviors you exhibit in your roles and responsibilities (i.e., what you demonstrate in your daily life).

PART II: PEARMAN FLEXINDEX

Part II: Pearman FlexIndex

The Pearman FlexIndex measures a specific set of skills and competencies that allow you to flex and adapt to meet ever-changing demands, allowing you to understand and improve your effectiveness. On their own, these flexibility skills allow you to leverage psychological resources to take proactive action, remain calm and composed, connect with others, seek out a variety of experiences, and recover and rejuvenate from stress.

The Pearman was also designed to integrate information from your FlexIndex with your personality type. Combining these two sources of information enables the Pearman to speak to your potential for improving or leveraging your flex skills to enhance your effectiveness.

How to Use This Report

SAMPLE PART I GRAPHS

The Circle

The circles provide your personality scores, which compare your results for each of the personality types. Each circle contains two components: the letter and the circle score. There are both “Natural” circles and “Demonstrated” circles for each personality attitude or function. The letter represents the personality type that you are more comfortable with or use more. The example on the left shows the letter “E” for “Extraversion”. An individual with that letter is naturally more comfortable with extraverted behaviors than with introverted (I) behaviors.

The circle score (75 in the example) represents the degree of comfort (for Natural) or use (for Demonstrated) of the personality type indicated by your letter. Each circle score ranges from 51-99. A score of 51 would indicate an almost equal comfort with or use of extraverted and introverted behaviors, while a score of 99 would indicate substantially greater comfort for or use of extraverted behaviors. The fill of the circle is a visual representation of your circle score.

Average Response Bar

The average response bars help you understand how you got your letters and circle scores. The marker () on each bar represents your average response for each scale (in the example, you can see the average response for all Extraversion [E] items and for all Introversion [I] items). The marker with the higher average score (i.e., the one closest to the right of the bar) indicates your letter. In the example, the “E” average is higher than the “I” average, and this resulted in an E in the circle. The distance between the markers is also important. The further apart the markers are, the higher your circle score will be (indicating a higher relative degree of comfort/use of the personality type indicated by your letter).

Additionally, your average responses are compared to other individuals with the same letter. If your circle letter is “E,” your average responses will be compared to the other extraverts in the Pearman normative group. (Shown with the  symbol.)

In this example, the individual’s comfort with extraverted behaviors is above the average for extraverted individuals. His or her comfort with introverted behaviors is also above the average for extraverted individuals.

SAMPLE PART II GRAPHS

Part II Scores

The Pearman FlexIndex uses a different type of score. Each FlexIndex skill score is provided on a bar where the average score is 100. Higher scores indicate more flexibility, while lower scores indicate less flexibility. Score labels provide a visual guide, indicating if a score falls into a low (less than 90), mid (90-109), or high (110 or higher) range.

With the selection of the leadership lens, a leadership marker () is provided to indicate where top leaders score on each FlexIndex skill.

Overview of Scores for Part I

This page provides an overview of your overall attitude, perceiving, and judging functions. Your Overall Attitude reflects how you interact and engage with the world. Your Overall Perceiving function reveals how you observe and take in information. Your Overall Judging function illustrates how you make decisions based on the information you have collected.

Your circle scores are divided into what you feel most comfortable doing (Natural) and what you do most often (Demonstrated). This is only an overview, it is important that your personality type be examined further by exploring and understanding each of your mental functions found later in this report.

Overall Attitude: Extraversion (E) vs. Introversion (I)

Extraversion (E) focuses on external experiences, stimuli in the outer world, and directing energy toward the external world and the people in it.

Introversion (I) focuses on internal experiences, stimuli in the internal world, and directing energy internally towards ideas, thoughts, and perceptions.

NATURAL

As a Natural extravert:

- You are more comfortable with engaging in group interactions
- You naturally initiate discussions with others
- You favor a focus on the world outside of yourself

DEMONSTRATED

As a Demonstrated introvert:

- In your everyday life one-on-one discussions are more common
- You often reenergize by spending time alone
- You need to formulate ideas internally before sharing

Perceiving Functions: Intuiting (N) vs. Sensing (S)

Intuiting (N) is a focus on possibilities, ideas, and big picture thinking. People who are comfortable with or display intuiting behaviors will likely focus on the connections and trends in information over the verifiable facts.

Sensing (S) is a focus on specific details, tangible objects and dealing with the task at hand. People who are comfortable with or display sensing behaviors will likely choose practical information over abstract concepts.

As a Natural intuitor:

- You are naturally inclined to engage in big-picture thinking
- You tend to see connections between ideas
- You prefer to focus on the future and possibilities

As a Demonstrated intuitor:

- In your day-to-day life you engage in big-picture thinking
- You spend time seeing connections between ideas
- You more often than not focus on the future and possibilities

Judging Functions: Feeling (F) vs. Thinking (T)

Feeling (F) is an emphasis on using personal values and ideals and arriving at a solution that feels right when weighed against one's personal beliefs.

Thinking (T) is an emphasis on making observations, critiquing findings, and analyzing outcomes. Decisions are evaluated based on alignment with a known theory or logic.

As a Natural feeler:

- You tend to make decisions based on principles and values
- You are comfortable being diplomatic
- You naturally look to understand others' point of view

Demonstrated Blended Judging means:

- You tend to balance values and analytical options
- Day-to-day you balance results with group harmony
- In your everyday life you evaluate decisions from many angles

== Blended

Overview of Scores for Part II

Your Total FlexIndex

The Pearman Flex Index encompasses the skills, abilities, and preferences that provide you with the agility and resilience needed to solve problems, remain composed, connect with others, seek beneficial experiences, and cope with and recover from strain. Your Total Flex Index score indicates that you excel at using these skills. Examine each of your subscales in the *Part II: Flex Index* section of this report to identify areas that may differ from your total score and to harness your skills and implement strategies for leveraging them in alternative contexts.

SUBSCALE DESCRIPTIONS

Proactivity

Proactivity refers to the skills necessary for active problem-solving and taking decisive action when you are faced with a challenge. Your score indicates that you are highly proactive. Keep this strength in mind as you move through different sections of this report.

Composure

Composure involves being able to remain calm and controlled under times of stress or criticism. Your selected responses indicate that you are able to remain level-headed during high-pressure situations. Think about how different situations test your ability to keep your cool.

Connectivity

Connectivity involves being connected with others, forming beneficial relationships, and seeking and reciprocating social support. Your score indicates that you are almost always able to create and maintain beneficial relationships. You may find some useful tips in this report for fine tuning your skills.

Variety-Seeking

Variety-Seeking refers to the preference for novel experiences, variety over routine, and openness to new opportunities for growth. Your score suggests that you are sometimes open to new experiences. This report provides a number of strategies for improving your ability to manage new events.

Rejuvenation

Rejuvenation involves positive coping strategies used to maintain health and minimize stress. You are well equipped to unwind and maintain your overall well-being. As you move through this report, reflect on how these skills can be leveraged or fine-tuned in alternative contexts or situations.

Part I: Overall Attitude

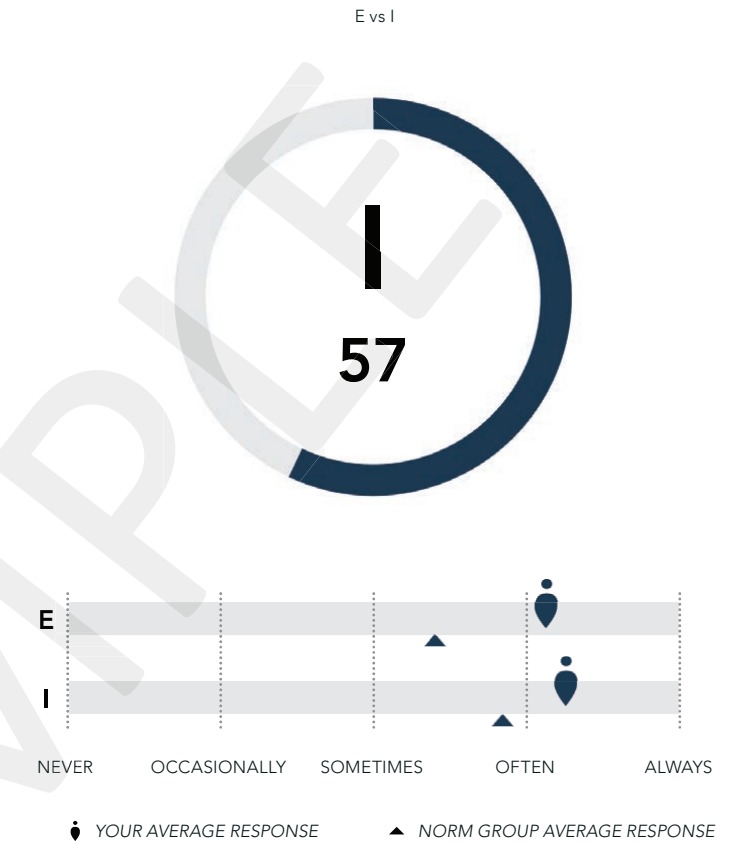

Extraversion (E) - Energized by and directing energy toward the external world and the people in it; sharing connection

Introversion (I) - Energized by and directing energy toward the internal world of ideas and perceptions; independent, reflective

NATURAL

DEMONSTRATED

Natural Attitude

Your Natural circle score indicates that you are only slightly more comfortable with extraverted than introverted behaviors. That is, you are marginally more comfortable with outward expression than with focusing on your internal thoughts.

Demonstrated Attitude

Your Demonstrated circle score indicates that you display slightly more introverted behaviors than extraverted behaviors. That is, you are marginally more likely to focus on your internal thoughts than you are to display outward expression.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE

While you show different Attitudes for Natural and Demonstrated, both scores were close to 50, indicating a relatively balanced use of extraversion and introversion and a high degree of alignment between your circle scores. While this minimizes any tension in your current situation, reevaluate this alignment when taking on additional responsibilities or roles that require you to demonstrate an attitude that does not align with your natural comfort.

Part I: Overall Perceiving

Intuiting (N) - Perceiving focus on patterns and the big picture; ideas, possibilities

Sensing (S) - Perceiving focus on details and objective facts; concrete, realistic

NATURAL

DEMONSTRATED

Natural Perceiving

Your Natural circle score indicates that you are moderately more comfortable with intuiting than sensing behaviors. That is, you are somewhat more comfortable with focusing on the big picture than focusing on concrete details.

Demonstrated Perceiving

Your Demonstrated circle score indicates that you display moderately more intuiting behaviors than sensing behaviors. That is, you are somewhat more likely to focus on ideas and possibilities than you are to focus on the details and realities of the situation.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE

There is a high degree of alignment between your Natural and Demonstrated Attitudes, suggesting that you operate in a way that is comfortable for you. While this minimizes any tension you could feel in your current situation, reevaluate this alignment should you take on additional responsibilities or roles that require you to demonstrate a preference that does not align with your natural comfort.

Part I: Overall Judging

Feeling (F) - Decision making strategy based on ideals and values; harmony, connection

Thinking (T) - Decision making strategy based on logic and analytically derived results; evidence, precise

NATURAL

DEMONSTRATED

Natural Judging

Your Natural circle score indicates that you are only slightly more comfortable with feeling than thinking behaviors. That is, you are marginally more comfortable with making decisions based on ideals and values compared to logic and results.

Demonstrated Judging

Your Demonstrated circle score indicates that you display equal amounts of feeling and thinking behaviors. That is, you are similarly likely to focus on ideals and values as you are to focus on logic and results when making a decision.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE

While you show different Attitudes for Natural and Demonstrated, in both cases the score was close to 50, indicating a relatively balanced use of both feeling and thinking and a high degree of alignment between your circle scores. While this minimizes any tension you could feel in your current situation, reevaluate this alignment should you take on additional responsibilities or roles that require you to demonstrate a preference that does not align with your natural comfort.

Part I: Extraverted Perceiving

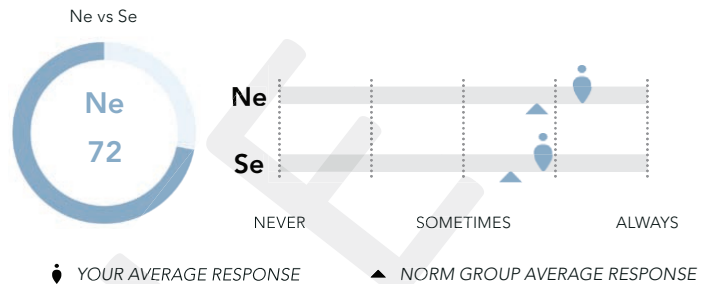

Extraverted Intuiting (Ne) - Sharing ideas about the big picture, discussing possibilities; patterns, broad ideas

Extraverted Sensing (Se) - External focus on the facts and information relevant to the immediate situation; experiential, concrete

NATURAL

DEMONSTRATED

Natural Extraverted Perceiving

Your Natural circle score indicates that you are moderately more comfortable with extraverted intuiting than extraverted sensing behaviors. That is, you are somewhat more comfortable with sharing possibilities than with discussing pragmatic information.

Demonstrated Extraverted Perceiving

Your Demonstrated circle score indicates that you display moderately more extraverted intuiting behaviors than extraverted sensing behaviors. That is, you are somewhat more likely to share broad ideas than you are to share experiential information.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE IN LEADERSHIP

Your Natural comfort lies with extraverted intuiting behaviors, such as active brainstorming and discussion of new options, establishing tolerance of ambiguity, and bringing an entrepreneurial spirit to your work and teams. Your comfort with these behaviors can be especially useful when navigating new waters as a team or organization, or when working on more creative endeavors. Furthermore, you appear to be demonstrating a very similar amount of extraverted intuiting behaviors compared to your natural comfort. There is a high degree of alignment between your Natural and Demonstrated functions, suggesting that you operate in a way that is comfortable for you. This allows you to portray a consistent demeanor and message as a leader. It also ensures that you are not burdened by strain from operating outside of your comfort zone, allowing you to focus on your team and other individuals rather than having to be overly focused on managing your own behaviors. While this minimizes any tension you could feel in your current situation, re-evaluate this alignment should you take on additional responsibilities or roles that require you to demonstrate a function that does not align with your natural comfort.

INTEGRATION WITH FLEXINDEX

Extraverted Perceiving processes are what you use to identify emerging patterns and possibilities in a situation and communicate concrete facts in the moment. The Rejuvenation and Composure FlexIndex subscales have strong connections to Extraverted Intuiting (Ne) and Extraverted Sensing (Se), respectively. Rejuvenation's role in Extraverted Intuiting (Ne) is to provide the energy needed to innovate and generate ideas. Composure's role in Extraverted Sensing (Se) is to provide greater focus and awareness. By increasing your skills in Rejuvenation and Composure, you will be able to enhance your Extraverted Perceiving mental functions. Additionally, Variety-Seeking can help you develop the skills necessary to flex between the two types of Extraverted Perceiving behaviors. Increased Variety-Seeking provides your Ne and Se mental functions with the wealth of experience needed to form accurate and clear perceptions, and to do so with minimal strain.

Part I: Extraverted Judging

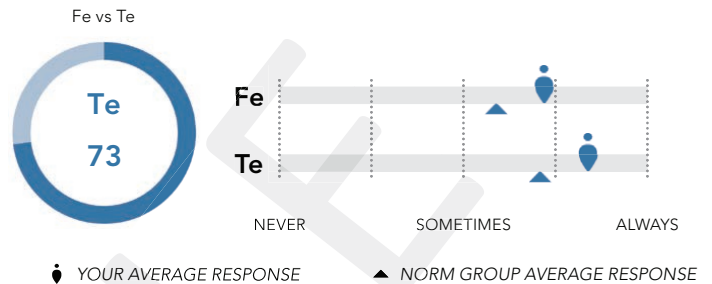

Extraverted Feeling (Fe) - Focus on connecting with others and understanding their point of view; empathy

Extraverted Thinking (Te) - Presentation of objective information, logical understanding, and systematic analysis of results; critique

NATURAL

DEMONSTRATED

Natural Extraverted Judging

Your Natural circle score indicates that you are only slightly more comfortable with extraverted thinking than extraverted feeling behaviors. That is, you are marginally more comfortable with outwardly analyzing and critiquing than with connecting and sharing.

Demonstrated Extraverted Judging

Your Demonstrated circle score indicates that you display moderately more extraverted thinking behaviors than extraverted feeling behaviors. That is, you are somewhat more likely to share analysis and critique than you are to connect with the values of others.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE IN LEADERSHIP

Your Natural preference for extraverted thinking means that you prefer to provide concise and to the point directions, help others see the logical conclusion, and delegate tasks in a clear manner that gives individuals the specifics of what they need to do. This preference allows you to become efficient in your leadership style and be seen as someone who is focused and can execute plans. However, there is misalignment between your Natural and Demonstrated extraverted thinking circle scores. You may wish to spend some time evaluating this difference, identifying areas where it may affect your behavior, and uncovering any potential strain you might experience as a result of this difference. Furthermore, your demonstrated circle score appears to be higher than your natural circle score. In leadership positions, it is important to convey a consistent message to your direct reports. Fluctuating between different levels of your Natural and Demonstrated types due to strain and/or unmanageable tension can portray conflicting messages. Letting the situation dictate your behavior can be a useful tactic, but only when you are able to manage it effectively.

INTEGRATION WITH FLEXINDEX

Extraverted Judging processes are what you use to express ideals, foster connections between people, share your observations and solutions, and communicate long-term plans. The Composure and Connectivity FlexIndex subscales have strong connections to Extraverted Feeling (Fe) and Extraverted Thinking (Te), respectively. Composure's role in Extraverted Feeling (Fe) is to provide you with confidence when choosing among alternatives, especially when dealing with difficult decisions. Connectivity's role in Extraverted Thinking (Te) is to provide you with an understanding of the impact of your decisions on others. By developing tactics to remain calm and increasing connectedness with others, you will build the capacity to enhance your Extraverted Judging mental functions. Additionally, Rejuvenation can help you develop the skills necessary to flex between the two forms of Extraverted Judging behaviors. Rejuvenation provides your Fe and Te mental functions with a variety of coping strategies so that you can make tough decisions and recover from stress.

Part I: Introverted Perceiving

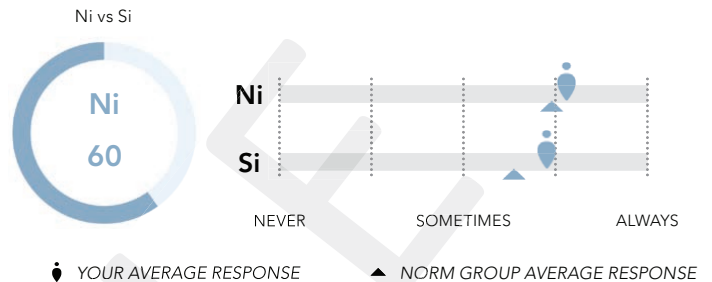

Introverted Intuiting (Ni) - Envisioning connections and understanding associations between scenarios; imaginative, theoretical

Introverted Sensing (Si) - Mental focus on details and tasks and internal verification of information; cataloguing, verifying

NATURAL

DEMONSTRATED

Natural Introverted Perceiving

Your Natural circle score indicates that you are only slightly more comfortable with introverted intuiting than introverted sensing behaviors. That is, you are marginally more comfortable with envisioning connections than with internally verifying information.

Demonstrated Introverted Perceiving

Your Demonstrated circle score indicates that you display moderately more introverted intuiting behaviors than introverted sensing behaviors. That is, you are somewhat more likely to envision connections and scenarios than you are to catalogue and verify information.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE IN LEADERSHIP

Your Natural comfort lies with introverted intuiting behaviors, such as clarifying scenarios, imagining possibilities and choices, and looking for creative pathways. Leaders are often the source of innovation and change, something that you can provide by imagining and looking for alternative approaches. Furthermore, you appear to be demonstrating a very similar amount of introverted intuiting behaviors compared to your natural comfort. There is a high degree of alignment between your Natural and Demonstrated functions, suggesting that you operate in a way that is comfortable for you. This allows you to portray a consistent demeanor and message as a leader. It also ensures that you are not burdened by strain from operating outside of your comfort zone, allowing you to focus on your team and other individuals rather than having to be overly focused on managing your own behaviors. While this minimizes any tension you could feel in your current situation, re-evaluate this alignment should you take on additional responsibilities or roles that require you to demonstrate a function that does not align with your natural comfort.

INTEGRATION WITH FLEXINDEX

Introverted Perceiving processes are what you use to see possible choices and to notice and internalize specific details. The Rejuvenation and Variety-Seeking FlexIndex subscales have strong connections to Introverted Intuiting (Ni) and Introverted Sensing (Si), respectively. Rejuvenation's role in Introverted Intuiting (Ni) is to provide you with the renewed energy and inspiration to take a fresh look at a situation and find new possibilities. Variety-Seeking's role in Introverted Sensing (Si) is to provide you with a storehouse of experiences to internally cross-reference with new information. By increasing your skills in Rejuvenation and Variety-Seeking, you will build the capacity to enhance your Introverted Perceiving mental functions. Additionally, Proactivity can help you develop the skills necessary to flex between the two types of Introverted Perceiving behaviors. Being proactive can help you learn to anticipate future circumstances, whether through relying on insight and instincts or on evidence and data. Acting ahead to reduce potential difficulties will help you to face challenges with minimal strain.

Part I: Introverted Judging

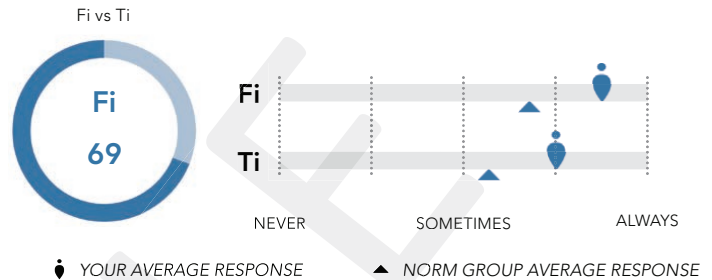

Introverted Feeling (Fi) - Focus on internalized values, ideals, and what is meaningful; growth, values

Introverted Thinking (Ti) - Internal concern with understanding logical/theoretical and underlying basis for information; principles, autonomy

NATURAL

DEMONSTRATED

Natural Introverted Judging

Your Natural circle score indicates that you are only moderately more comfortable with introverted feeling than introverted thinking behaviors. That is, you are somewhat more comfortable with internalizing values and ideals than you are working through logical information and precise details.

Demonstrated Introverted Judging

Your Demonstrated circle score indicates that you display moderately more introverted feeling behaviors than introverted thinking behaviors. That is, you are somewhat more likely to internalize values and ideals than you are to analyze logical and precise details.

INTEGRATION OF NATURAL AND DEMONSTRATED TYPE IN LEADERSHIP

Your Natural comfort lies with introverted feeling behaviors, such as aligning your choices with the mission of the organization, identifying others' talents, and clarifying and aligning options with values. These behaviors can be useful in terms of creating a team environment where employees are engaged with their work and the impact of their work is understood and appreciated. Furthermore, you appear to be demonstrating a very similar amount of introverted feeling behaviors compared to your natural comfort. There is a high degree of alignment between your Natural and Demonstrated functions, suggesting that you operate in a way that is comfortable for you. This allows you to portray a consistent demeanor and message as a leader. It also ensures that you are not burdened by strain from operating outside of your comfort zone, allowing you to focus on your team and other individuals rather than having to be overly focused on managing your own behaviors. While this minimizes any tension you could feel in your current situation, re-evaluate this alignment should you take on additional responsibilities or roles that require you to demonstrate a function that does not align with your natural comfort.

INTEGRATION WITH FLEXINDEX

Introverted Judging processes are what you use to evaluate situations within the context of your ideals and values and to reflect on and process information to come to your own conclusions. The Variety-Seeking and Proactivity FlexIndex subscales have strong connections to Introverted Feeling (Fi) and Introverted Thinking (Ti), respectively. Variety-Seeking's role in Introverted Feeling (Fi) is to emphasize understanding of and openness to ideas when making a decision. Proactivity's role in Introverted Thinking (Ti) is to provide multiple plans and anticipate options as a situation unfolds. By increasing your variety of experiences and developing the habit of planning ahead, you will build the capacity to enhance your Introverted Judging mental functions. Additionally, Composure can help you develop the skills necessary to flex between the two types of Introverted Judging behaviors. Being composed can help you remove the internal distress that distorts your ability to make decisions. Developing strategies for internal calm and focus can help minimize the strain of making difficult choices.

Part II: Your FlexIndex

Your Total FlexIndex

About Your Score

The Pearman Flex Index encompasses the skills, abilities, and preferences that provide you with the agility and resilience needed to solve problems, remain composed, connect with others, seek beneficial experiences, and cope with and recover from strain. Your Total Flex Index score indicates that you excel at using these skills. Be sure to examine each of the subscales independently in order to identify areas in which you can implement strategies for leveraging them in alternative contexts. Your score suggests that you utilize adaptive and flexible behaviors to a similar degree as top leaders. These skills

and competencies are needed in order to remain agile as a leader. Look to each subscale for actionable strategies in order to increase your overall level of flexibility. One or more of your subscales appear to be significantly different from your average score. Pay particular attention to subscales that appear much higher or much lower compared to the rest.

Proactivity

Your Score

Your Proactivity responses suggest that you often take action and actively anticipate problems before they arise. Look for ways to leverage your proficiency in new contexts.

Leadership Lens

Leaders who score high on Proactivity are often able to take advantage of opportunities for themselves and their direct reports. Your team may see you as very capable of pre-emptively solving problems and helping them towards a solution with their own difficulties. Other leaders seek to collaborate with you to help anticipate critical opportunities and prepare for possible roadblocks. Your team is likely to benefit from your competency with anticipating issues and generating actionable solutions. As a leader, others see you as very prepared with the knowledge needed to be proactive in your execution of projects, tasks, and delegation.

Development — Being a Top Leader

Your results speak of a well-developed ability to generate solutions to complex problems. However, compared to top leaders, you appear to be engaging in fewer proactivity behaviors. Further development will refine your proficiency.

- Pursue a deeper understanding before jumping into action mode.
- Evaluate what truly needs pre-emptive resolution and what can be resolved later.
- Get a second perspective: make a list of questions direct reports can use to evaluate a situation.
- Anticipate the types of behavior needed of your upcoming appointments and meetings and mentally prepare yourself.

Part II: Your FlexIndex

Composure

Your Score

Your results suggest that you consistently showcase a calm and collected demeanor that assures and motivates others. Look for ways to leverage this proficiency in new contexts.

Leadership Lens

Composure allows a leader to become a role model of poise and self-regulation when encountering multiple sources of stress or criticism. Your score suggests you show extreme patience in demanding situations and remain very calm when dealing with a range of stressors. Your team's view of your composure can instill confidence in their own ability to take command of a situation with patience and understanding. Other leaders may come to you with problems and opportunities as they see you're able to remain composed under any workload or stressors. However, occasionally letting others see some passion behind your words and actions can empower your ability to lead others and engage followers.

Development — Being a Top Leader

Compared to top leaders, you appear to be even more capable of remaining composed when under pressure and facing criticism. You naturally appear composed and leaders tend to rely on you to be present in high-level meetings and tough discussions.

- Letting passion through your self-regulation filter will allow other leaders to see you're as involved and willing to fight for what is right, and inspiring them to do the same.
- Focus on modifying your behavior rather than trying to control an uncomfortable situation.
- Remaining extremely composed for other leaders and your team for long periods of time may necessitate rejuvenating activities that let you release any pent-up stress.

Connectivity

Your Score

Your Connectivity result suggests that you are consistently able to develop valuable relationships. Look for ways to leverage your relationships in new contexts.

Leadership Lens

For a leader, Connectivity means being approachable and open, helping others, building productive teams that can communicate clearly, developing strong working relationships, and maintaining relationships at all levels of an organization. Your result suggests that you are very successful in this area of leadership. The time that you devote to building connections among leaders and with your team that rest on open communication and shared achievements directly results in being able to lean on these individuals in difficult situations. Other leaders will appreciate that you build reciprocal relationships and are therefore likely to open up and devote resources to your endeavors.

Development — Being a Top Leader

As a leader you are expected to be and to help others become more connected within the organization. While you are highly proficient in Connectivity, your responses indicate that you engage in slightly fewer connectivity behaviors compared to top leaders.

- Spend time developing relationships even when you are busy or not in need of assistance.
- Look to leadership groups outside of your organization to diversify your connections and gain insight from outside perspectives.
- Leverage your network of friends and family outside of your own industry for additional perspective.
- Set up opportunities for your team to showcase their success and talent.

Part II: Your FlexIndex

Variety-Seeking

Leadership Lens

Variety-seeking behavior positions leaders with the ability to pivot to meet the demands of the situation and learn quickly when conditions change. Your responses to the Variety-Seeking items suggest that you are likely to seek novel experiences. This can be beneficial to your ability to make connections between emerging ideas and relate them to your experiences inside and outside of your organization. Further, you are somewhat willing to make decisions that could upset the traditional balance of your team or your organization. This is crucial as leaders often need to accept some element of risk in order to embrace uncertain advances in innovation.

Your Score

Your result indicates that you are generally open to new experiences. Focusing your developmental efforts here will allow you to benefit from variety in your organization and from growth opportunities.

Development — Being a Top Leader

Leaders who embrace innovation are seen as spearheading the future of an organization and leading it forward. Use these strategies for action to bring your Variety-Seeking in line with top leaders.

- Think of new experiences and opportunities as challenges to be mastered. Treat this as an evaluation phase to determine whether it should be experienced by the rest of your team or organization.
- Keep alternative solutions in your back pocket so that you are ready to pivot as soon as you encounter challenges.
- Look outside of your organization for innovative ideas from alternative industries that can be modified to fit yours.
- Periodically review your direct reports' visions of their future careers and create opportunities to align possibility with reality.

Rejuvenation

Leadership Lens

Leaders often face immense pressure from all directions. Your score suggests that you are very well-equipped to handle the stress of being a leader in a modern organization. Consistently engaging in rejuvenating activities prevents any stress you feel from affecting your team. Your coping strategies and relaxation techniques allow you to easily manage day-to-day stressors and protect you against exceptionally stressful events, such as layoffs, turnover, and even taking on new responsibilities in a different position. Other leaders see the work you put in when managing stress, which further strengthens their confidence in your ability to back them up in stressful endeavors.

Your Score

Your result suggests that, relative to some of your other subscales, Rejuvenation is a strength for you. You are consistently able to benefit from stress-relieving and stress-preventative measures.

Development — Being a Top Leader

Leaders can often be overwhelmed by the sheer amount of responsibilities pulling them in every direction. Your skill with rejuvenation behaviors is higher than top leaders.

- Think about the stress levels of those around you and the impact this has on you.
- Look for effective times to rejuvenate. For example, doing yoga at lunch time not only benefits the body, it also releases any stress from the morning.
- Track your food and drink intake to understand how it affects your overall well-being and productivity.
- Look for leadership groups and forums where you can learn how other leaders handle stress and release tension.

Leadership Integration

This page integrates your FlexIndex scores with a model of leadership based on four competencies: authenticity, coaching, insight, and innovation. Particular FlexIndex subscales are associated with stronger performance in certain leadership competencies and thus have been divided into primary and secondary subscales. Those subscales related to all four leadership competencies are labeled as primary. Those related to only one or two competencies are labeled as secondary.

Authenticity

An authentic leader serves as a role model for moral and fair behavior. A transparent approach commands esteem and confidence from employees.

Coaching

A leader who coaches effectively is seen as a mentor who supports employee growth. Employees are nurtured towards achieving their highest levels of performance.

Insight

A leader provides insight by sharing a purpose and hopeful vision for colleagues to follow. Employees are compelled and inspired to exceed goals.

Innovation

An innovative leader focuses on taking risks, spurring colleagues' ingenuity and autonomous thought. Knowledge is valued and challenges are viewed as learning opportunities.

Primary Subscales

Proactivity. You are almost always able to anticipate needs and tasks ahead of time and take action. This means that you are almost never left pressed for time, making it easy for you to find time to develop and mentor your team members. This also means that you are able to anticipate difficulties, be future-oriented, and question long-term assumptions.

Connectivity. Your extreme proficiency lets you form deeper relationships with your direct reports, allowing you to be seen as a role model, provide growth opportunities for hidden competencies, tailor your vision to selectively inspire, and understand who to let operate autonomously and when to spur ideas.

Variety-Seeking. Your openness may make it easier to inspire others with a transparent vision and learn from risky opportunities. It also allows you to nurture others who would benefit from creative growth opportunities and outside-the-box inspiration.

Secondary Subscales

Composure. In high-pressure environments where stress and ingenuity create an element of risk, you are exceptionally skilled at remaining calm and collected so you can communicate a clear vision, and being patient so you can inspire others towards innovative breakthroughs.

Rejuvenation. Ingenuity and innovation are often found in unlikely places, especially when you take the time to renew your health and refocus your mind, something that you seem to be doing quite a lot of.

Putting It All Together

As a leader, it is your responsibility to promote positive skill development and establish an environment that encourages transparency, shared purpose, ingenuity, and autonomy. Crafting a truly innovative and inspiring culture is challenging work that requires forward thinking, a calm demeanor, relationship management, openness, and a fresh perspective. Targeting development to bring your lower performing subscales in line with the rest will better equip you with the skills needed to create an environment where passion and learning thrive.

Type and FlexIndex Integration

Being flexible and agile is useful to your personality type in two ways: (1) **within mental function** flexibility means that you are flexible enough to use the full range of talents of the function; and (2) **across mental function** flexibility means you are able to constructively use the opposite of your natural type. Developing your **FlexIndex** can help you increase your within mental function and across mental function flexibility.

EXTRAVERTED ATTITUDE

PERCEIVING	EXTRAVERTED SENSING (Se)	EXTRAVERTED INTUITING (Ne)	EXTRAVERTED THINKING (Te)	EXTRAVERTED FEELING (Fe)	JUDGING
	WITHIN FUNCTION FLEXIBILITY: focusing on immediate awareness and identifying tangible experiences.	WITHIN FUNCTION FLEXIBILITY: focusing on possibilities, patterns, and finding themes and trends.	WITHIN FUNCTION FLEXIBILITY: focusing on the results of a situation and identifying options to achieve long-term outcomes.	WITHIN FUNCTION FLEXIBILITY: focusing on connecting with others and being comfortable with interpersonal differences.	
	ACROSS FUNCTION FLEXIBILITY: accessing Intuiting to identify possibilities and innovations.	ACROSS FUNCTION FLEXIBILITY: accessing Sensing to catalog methods and processes for developing ideas.	ACROSS FUNCTION FLEXIBILITY: accessing Feeling to understand connections between individuals and acknowledge other perspectives.	ACROSS FUNCTION FLEXIBILITY: accessing Thinking as a way to investigate probable outcomes of solutions and choices.

FLEXINDEX GROWTH: develop Variety-Seeking so that more experiences expand an understanding of possible actions.	

INTROVERTED ATTITUDE

Name: Mariana Felicita

Your Pearman report includes a summary and interpretation of your EQ-i 2.0 results as they pertain to your Pearman personality type. This page summarizes the scores from your EQ-i 2.0 assessment. This integration allows connections to be made that detail the interplay of personality and emotional intelligence (EI) competencies. Understanding how your Overall Attitude,

Perceiving, and Judging connect with particular EI skills can shape development and illuminate blind spots. Your scores suggest that you are proficient in most of the emotional and social skills that influence the way you perceive and express yourself, develop and maintain social relationships, cope with challenges, and use emotional information in an effective and meaningful way.

OVERALL SCORES

TOTAL EI

SELF-PERCEPTION COMPOSITE

Self-Regard Respecting oneself; confidence

Self-Actualization Pursuit of meaning; self-improvement

Emotional Self-Awareness Understanding own emotions

SELF-EXPRESSION COMPOSITE

Emotional Expression Constructive expression of emotions

Assertiveness Communicating feelings, beliefs; non-offensive

Independence Self-directed; free from emotional dependency

INTERPERSONAL COMPOSITE

Interpersonal Relationships Mutually satisfying relationships

Empathy Understanding, appreciating how others feel

Social Responsibility Social consciousness; helpful

DECISION MAKING COMPOSITE

Problem Solving Find solutions when emotions are involved

Reality Testing Objective; see things as they really are

Impulse Control Resist or delay impulse to act

STRESS MANAGEMENT COMPOSITE

Flexibility Adapting emotions, thoughts and behaviors

Stress Tolerance Coping with stressful situations

Optimism Positive attitude and outlook on life

HAPPINESS Satisfied with life; content

LOW RANGE MID RANGE HIGH RANGE

PEARMAN AND EQ -i 2.0 INTEGRATION

This page serves to integrate your overall attitude, overall perceiving, and overall judging functions with specific subscales from your EQ-i 2.0. Chosen based on theory and research, the specific EQ-i 2.0 subscales highlighted for each attitude and function allow you to understand the connection between your natural personality type and related aspects of your emotional and social functioning.

Impulse Control

As an extravert, Impulse Control can be useful in helping you become more selective in what you share with the group and when you share it. Picking the right time to speak up and act is useful when attempting to get others to see your point of view or establish buy-in on new ideas. Your Impulse Control score suggests that you may have difficulty resisting the temptation to act or immediately share what you are thinking with others. Taking a minute to pause and think about the situation and the audience can help you determine if what you are about to say or do can be saved for a time when it would have a bigger impact or a more effective reception.

Reality Testing

Optimism

As an intuitor, Reality Testing and Optimism can impact how your natural preference plays out in your behavior. Reality Testing provides the checks and balances needed to stay grounded in your perceptions of and excitement for themes and the big picture. Your Reality Testing score indicates that you are generally able to see your ideas, connections, and patterns as they truly are, and when some may be too impractical to execute. Also, your high level of Optimism suggests that you are quite confident in your ideas and can see them working out. Balancing this with more Reality Testing should allow you to stay grounded during extensive brainstorming sessions.

Problem Solving

Independence

As a feeler, Problem Solving and Independence are important skills that can modify how you make decisions and evaluate information. Your Problem Solving score suggests that you may not always be able to channel emotions towards effective solutions. Further development will allow you to effectively manage your emotions and your preference so that you do not become overly focused on your individual ideals when proposing resolutions. Your Independence score suggests that you are quite self-directed when making decisions. You are conscious of seeking others' input as it can be easy to focus too much on aligning decisions with their values and ideals. Integrating your proficiency into your feeling preference allows you to balance your focus on operating autonomously with appeasing everyone's opinions and ideas.

Action Plan

The steps that you take towards achieving your goals will determine whether or not success is realized. Use this step-by-step activity plan to help guide you closer to your goals.

Write down up to five skills or behaviors that you would like to further develop. The information provided throughout your report may be useful for determining individual actions that you can either do less of (STOP), begin to do (START), or do more of (GROW).

Remember to use the SMART goal-setting criteria for each goal.

SPECIFIC
MEASUREABLE
ACTION-ORIENTED
REALISTIC
TIMELY

START

STOP

GROW

ACTION PLANNER TEMPLATE

SMART GOAL	TIME FRAME	BENEFITS	MEASURE OF SUCCESS	SUPPORT AND RESOURCES NEEDED	POTENTIAL BARRIERS

I commit to this action plan _____

Development Commitment

The Development Commitment is a tool to help hold you accountable for accomplishing the goals outlined in your Action Plan. As we all too often know, our plans for personal growth and development often fall by the wayside when we get engrossed in all of our tasks

and responsibilities. By outlining your objectives here and leaving a copy with your coach, you are made more accountable to reach your personal goals.

MY PERSONAL DEVELOPMENT GOALS

My action plan includes the following goals:

Due Date

1.	
2.	
3.	
4.

Summary

YOUR REPORT

Congratulations on completing the Pearman Personality Integrator and reaching the end of your personalized report!

This page concludes your experience with the Pearman and provides some reflection opportunities for you as you move forward with the wealth of information provided in this report. Now that you are equipped with new insight into your Pearman personality type and your FlexIndex skills, how you choose to put this information into action is up to you.

You have been provided with a vast amount of information about your Pearman personality type and your FlexIndex skills. One key to getting the most out of your Pearman report results is to think about your next steps. Whether you have created (or will create) an action plan or a development commitment, or you prefer to consider some simple steps you want to incorporate into your everyday life, it is important to remember that personal growth is always an ongoing process.

You may choose to reflect on your Pearman results as time goes by, and when you encounter situations that engage different mental functions and flexibility skills. Thinking about your own predispositions and flexibility skills will help fortify the information in this report and provide numerous opportunities to apply what you have learned.

As you continue on your journey of self-discovery, stop periodically to ask yourself some critical questions. What inherent function/attitude am I using in this situation? How does this impact the information I focus on? How does this impact the judgments I make? How can I implement or develop my flexibility skills to be more successful across a variety of situations?

Further, as you become more in tune with your own functioning, try to think about others' functioning as well. Understanding others' personality types and flexibility skills will provide deeper insight into your own personality and skills and will allow you to communicate, operate, and collaborate more effectively.
